

# What the heck is going on here?

## Workshop "OMS Insights & Analytics"

### What is OMS Insights & Analytics?

OMS Insights & Analytics components allow you to collect data from various sources into a single view for actionable insight. It allows you to spot problems fast by using pre-built solutions and queries and gives you behind-the-scenes details about your IT infrastructure and applications.

### What you will learn

In this 2-day workshop we will cover how to bring the OMS Insights & Analytics environment in Microsoft Azure to life. You will configure workspaces, attach different sources, collect, analyze and finally visualize data in various ways, with solutions from the gallery as well as custom solutions. At the end of the workshop, you will be able to create a design and an implementation plan for your company's analytics and insights requirements.

### Workshop facts

- 2-day workshop
- Structured workshop approach
- Workshop content updated before every single delivery
- Optimal mix of theory and hand-on-labs
- Comprehensive lab step-by-step guides and slide decks
- Experienced Microsoft MVP instructors
- Student community platform to exchange with others
- Stay in contact with your trainer even after the workshop
- Attendees bring their own notebooks to connect to the lab environment
- Workshop and all materials in English

## Who should attend this workshop

This workshop is for architects, engineers and operators that want to learn everything about OMS Insights & Analytics. No specific prerequisites are needed but basic Microsoft Azure and Microsoft Windows Server knowledge.

## Workshop topics overview

OMS Log Analytics Architecture	Manual and automated deployment options
Role-based access	Configuration of plans
Data sources (Windows servers, Linux servers, Azure resources, custom log files and many more)	Use solutions from the gallery (agent health, wire data, service map, network performance monitor and more)
Data collection configuration (events, performance, syslog, and more)	Create and use simple and complex search queries and favorites
Create computer groups	Create custom views
Forward data to Power BI to create comprehensive, interactive reports	Create and manage alerts with notifications and automatic remediation
Ingest custom data	Log search API
Data volume calculations	Log Analytics licensing
Using OMS gateways	Roadmap and future

## Why choosing the itnetX Academy?

There are tons of workshops offered by various academies worldwide, but ours are definitely different: itnetX is a Microsoft elite partner and system integrator that helps customers to design, implement and operate complex solutions that are based on Microsoft components. That said, we know what problems customers are faced with and what solution approaches exist to help customers reach their goals and become more productive. This knowledge is packed into our workshops and presented by professional instructors. If you want to learn from someone with real-world knowledge, customer experience and deep insights into a specific topic, take a first workshop and join our network—you will not be disappointed!

## Testimonials

"I learned a lot about OMS Log Analytics and can definitely say that we will start building solutions around it! The workshop instructor was very passionate and knew the content inside out. Great workshop!"

*Benno Kästli,  
CEO comperio.ch*

"I attended this workshop and must say it was a blast! Even as a Microsoft MVP I learned lots of new stuff. I can definitely recommend this workshop to everybody that plans to start with OMS Log Analytics!"

*Thomas Maurer,  
Microsoft MVP, itnetX*

## Next workshops

We deliver workshop across the globe. Check out our web site to see if a workshop is delivered in your region soon. Registration is easy as 1-2-3 and done within seconds. Get your seat now and we are looking forward to have you in one of our workshops soon!
