

Junior Microsoft Azure Cloud Consultant

Responsibility and ownership are important in working at ItnetX Belgium. The role of Junior Microsoft Cloud Consultant is to focus on delivering available, scalable enterprise solutions on the Microsoft Azure platform.

- Assist in the design & build systems in the cloud in collaboration with a Solution Architect
- Identifying the best technologies and services for their needs, constraints and strategies
- After a break-in period taking an active role in the community of consultants working in and throughout Belgium and beyond
- Contribute to the development of standards, best practices and organizational capability
- Optimize itnetX Cloud Services and vision

Qualifications

The junior consultant will have a first experience in industry skills and affinity in regard to a majority of the following topics:

- Service minded to build solutions on Microsoft Azure.
- Currently System Center focused, we have experience in making the transition to cloud...making you an expert in public and hybrid cloud solutions
- IT service and operations integration and management tools: Cloud management platforms, configuration management, automation and orchestration
- IT security and governance in relation to cloud computing
- For the cloud automation developers we practice DevOps with Agile and lean approaches to develop automation release and Infrastructure as Code (.NET, JSON, PowerShell...)

We Offer

ItnetX Belgium offers you:

- A challenging junior position within a fast growing and professional environment.
- Extensive internal and external training: You will be coached by experienced professionals and you have the opportunity to develop yourself through training, e-learning and knowledge sharing sessions.
- A market-tailored salary package, including extralegal advantages and a company car.

itnetX Belgium

ItnetX is unique. Not just in what we do, but even more in how we do it. Our team runs faster and thinks smarter. It is made up of world-class specialists in different areas. We are always on the lookout for colleagues who strive to understand technology in depth, and who are as driven as we are to create world-class solutions.

As a dynamic organization we support large, (inter)national companies implementing and using Microsoft solutions on different platforms to enhance productivity. As consultants, we bring our knowledge and experience into play, with the added force that comes from working as a team. That brings us interesting services to implement and work in a multi-faceted, inspiring environment. Our knowledge and personal approach are much appreciated, as evidenced by our growing client base.
