

Azure Cloud Solution Architect

Responsibility and ownership are important in working at ItnetX Belgium. The role of Microsoft Cloud Consultant is to focus on delivering highly available, scalable enterprise solutions on the Microsoft Azure platform.

- Architect, Design and build systems in the cloud
- Actively working with clients on solution strategies, designs, delivery and methodologies in transforming their business.
- Identifying the best technologies and services for their needs, constraints and strategies
- Participating in pre-sales; presenting proposed solutions to customers and contributing in providing content to proposals
- Taking an active leadership role in the community of consultants working in and throughout Belgium and beyond.
- Contribute to the development of standards, best practices and organizational capability
- Optimize itnetX Cloud Services and vision.

Qualifications

The consultant will have industry leading skills (or ambitious to learn) and affinity in regard to a majority of the following topics:

- The assessment of customer needs and readiness for a transition to cloud computing
- The design of public and hybrid cloud solutions
- The design and delivery of public and hybrid cloud migrations
- IT service and operations integration and management tools: Cloud management platforms, configuration management, automation and orchestration
- IT security and governance in relation to cloud computing
- Agile and lean approaches including DevOps, automation release and Infrastructure as Code (.NET, JSON, PowerShell...)
- Technology focus on Microsoft Azure. Open source platforms and Configuration management tools (Chef, Ansible ,puppet, Salt) knowledge is an advantage.
- Container concepts with Docker, OpenShift, Kubernetes....

Mindset is the most important skill and this will be challenged during an interview. Don't be afraid of the technology areas, the itnetX team is ready to onboard-train-upgrade your skills.

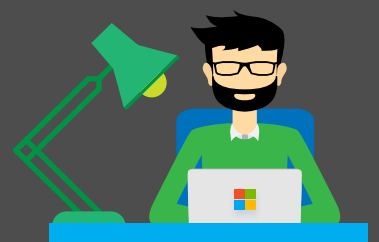

We Offer

ItnetX Belgium offers you a challenging position within a fast growing and professional environment. We offer you a market-tailored salary package, including extralegal advantages and a suiting company car.

itnetX Belgium

ItnetX is unique. Not just in what we do, but even more in how we do it. Our team runs faster and thinks smarter. It is made up of world-class specialists in different areas. We are always on the lookout for colleagues who strive to understand technology in depth, and who are as driven as we are to create world-class solutions.

As a dynamic organization we support large, (inter)national companies implementing and using Microsoft solutions on different platforms to enhance productivity. As consultants, we bring our knowledge and experience into play, with the added force that comes from working as a team. That brings us interesting services to implement and work in a multi-faceted, inspiring environment. Our knowledge and personal approach are much appreciated, as evidenced by our growing client base.
